## Conductive Plastic Corrugated Cardboard

This is a single hollow type of plastic carton board, manufactured with highly advanced technology of compression resin-molding

- Since conductivity is flowing throughout of the entire surface it is effective for prevention of electrification and removal of statics and fends off dirt and dusts.
- It has excellent resistance against water, oil and chemicals.
- It is light in weight, highly waterproof, and heat-resistant.
- It has high elasticity and excellent soundproof.
